

Optimize Onboarding with Able's New Integration with AviontèBOLD

Able's mobile-first onboarding automation platform has helped hundreds of staffing firms deliver a world-class onboarding experience for both candidates and recruiters. The solution was built around one simple, yet powerful idea—everyone deserves a great first day.

Expanding beyond its current integrated offering with Aviontè's classic solution, the recently announced integration will merge Able's candidate-focused onboarding solution with AviontèBOLD, offering users a native experience directly in the BOLD platform.

Candidates can complete each step of onboarding while on-the-go through a mobile-first experience and intuitive UI, and the process is supported by automated workflows that keep candidates on track and ensure that recruiters receive the forms and signatures needed before the first day on the job.

Key features of the [Able and AviontèBOLD integration](#) includes:

- **Natively Integrated Remote I-9/E-Verify Offering:** Compliance is made easy with a natively integrated I-9, including Sections 1-3, and E-verify offering that is built for remote hiring use cases.
- **Candidate Data Delivered In Real-Time:** State and federal tax information, along with other key data and documents, are mapped back to Aviontè in real-time, keeping candidate records accurate and up-to-date.
- **One Single Source of Truth:** Aviontè remains the single system of record, mitigating human error and inefficiency of managing multiple systems.
